Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance:

Claim 1 and its dependent claims are allowable over prior art of record because the prior art fails to teach, either singly or in combination, the claimed feature regarding controlling the temperature of the first substrate to a temperature higher than a solidus temperature of the low melting point metal and controlling the temperature of the second substrate to a temperature lower than a solidus temperature of the low melting point metal then joining the first metal bump and the second metal bump to effectuate the bonding of the two metal bumps due to the melting of a low melting point metal layer formed on a top portion of at least either of the first metal bump and the second metal bump.

Claim 8 and its dependent claims are allowable over prior art of record because the prior art fails to teach, either singly or in combination, the claimed feature regarding the steps of temporarily fixing the first metal bump and the second metal bump through the flux and then heating the first semiconductor substrate and the second semiconductor substrate to a temperature higher than the solidus temperature of the low melting point metal.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
